## SHARES WERE ACTIVE

Business on New York 'Change Had an Old-Time Boom.

Coalers, for Good Reason, Led in the Advance-Indianapolis Trade Generally Dull.

At New York, yesterday, money on call was easy at 11/202 per cent., the last loan being made at 11/2, closing offered at 11/2. Prime mercantile paper was 6@8 per cent. Sterling exchange heavy, with actual bus-

iness in bankers' bills at \$4.83% @4.84 for demand, and \$4.81%@4.82 for sixty days; posted rates, \$4.83@4.85; commercial bills, \$4.801/2@4.81.

Silver certificates, 731/2c bid. Bar silver closed at 7314c per ounce; at London, 3376d. The total sales of stocks, yesterday, were Tational sales of stocks, yesterday, were and shares. It was like what the street reminiscently alludes to as "the good old times," on the Stock Exchange, yesterday. The dealings were on a large scale, nearly everybody was on the bull side of the market, and there was an all-pervading air of buoyancy which carried everything before it. At the opening of business discouraging advices regarding the prospects of unconadvices regarding the prospects of unconditional repeal scaled the initial sales down 4 to 114 per cent., and the indications were decidedly depressing, but the temper of speculation was changed with magical rapidity by one of those special movements which mark the history of Wall street and which are seldom based on anything more solid than rumor. The moving influence in the market was a newspaper arti-cle announcing that the New Jersey Cen-tral party, led by President Maxwell and his friends, had obtained a controlling influence in Delaware, Lackawanna & West-ern, and would hereafter direct the policy of that corporation. Subsequently a transfer of 40,000 shares of Lackawanna to Wm. K. Vanderbilt led to the belief that there was a trunk line combination in the deal, and despite the remarkable lack of knowledge displayed by the president of the two roads named, the impression gained ground that the longanticipated project of a consolidation of the coal roads had taken shape. Reports were current that the Reading and Delaware Hudson companies were involved in the deal to the extent of being committed to adopt the policy to be butlined by the New Jersey Central party and the all the coal roads would act in harmony with the trunk lines. As a natural result the shares of the anthracite roads were in brisk demand and the upward movement therein carried forward the entire market. The fate of the silver bill was not considered as a factor of the situation, if thought of at all, and every Stock traded in responded to a greater or esser extent to the call for an advance. The industrials, with the exception of Sugar and Edison Electric, did not share Bugar and Edison Electric, did not share to any appreciable extent in the rise, and Distilling and Cudahy actually receded a fraction. Compared with Saturday's closing figures, the chief advances were Wheeling & Lake Erie preferred, 3½; Illinois Central, 1½; Lake Erie & Western, 1½; C., C., C. & St. L., 1½, and Chicago, Burlington & Quincy 1 per cent.

The railway and miscellaneous bond market sympathized largely in the strength of ket sympathized largely in the strength of the share speculation, and the issues dealt in advanced with but few exceptions, the most notable being Peoria, Decatur & Evansville seconds, which declined 8 per

### LOCAL GRAIN AND PRODUCE.

Business Quiet on the Wholesale Streets and commission Row. It is very seldom that business on the wholesale streets and on Commission row is as quiet as yesterday. The continued warm weather for October doubtless has something to do with the dullness; then the retail merchanti are doing business nearer to the hand-o-mouth policy than at any time for years, and purchase only to meet immediate rejuirements. In values there are no important changes. Poultry, eggs, fruits and vegetables are all weak at the quotations. Of Commission row the merchants say they never knew it more quiet, and with this stocks of apples and potatoes are I creasing and lower orices indicated. The market is glutted with quinces. Butter of good quality is wanted, the supply bing low. Staple groceries are steady at the revision of Saturday last, and projisions are easier; some descriptions, with the reduction of Saturday, being 1@2c pwer per pound than thirty days ago. The local grain market lacks snap,

GOOD BULGE IN WHEAT

Disappointingly Small Increase in Visible Responsible.

Strength in the Leading Cereal Prevented a Slump in Corn-Provisions Firm and Higher.

CHICAGO, Oct. 23 .- A badly stunted visible supply increase bulged the price of wheat to-day. The market closed with a net gain of 1/2c. Corn was inclined to heaviness, but a heavy break was prevented by the strength in wheat. It closed at a decline of 3/2c for the day. Provisions were firm and higher. Wheat at the opening was weaker and prices 1/40/3c lower than the closing figures Saturday, but prices advanced 11/4c above the opening figures, eased off a trifle, held steady, and the closing was about 1/40/3c higher than the closing figures of Saturday. When it first began to appear that the increase in the visible would be much less than calculated on it was found that there was very little wheat for sale. Shorts who had a profit attempted to secure it, and there was provented by unchanged. Wheat opened 1/4c off, but with good demand and encouraging conditions advanced, with one or two slight relapses, closing 1/2c up for options; cash lower; No. 2 red, cash, 581/4c; October, 581/4c bid; November, 59c; December, 690/4601/4c, closing at 69c. The market closed with a profit attempted to secure it, and there was a quick movement upward, less fortunate shorts trying meanwhile to stop losses. The New York contingent, which is supposed to be long on a big line of wheat which now shows a heavy loss, was believed to be using the change in sentiment to bull the market, and with considerable success. Another feature was the active buying by "Charley" Smith's brokers.

Corn receipts were somewhat larger than anticipated, which caused a slight reduction near the opening, but urgent inquiry from the short interest, coupled with the good inquiry from shippers, imparted considerable strength to the market during the early part of the session, and prices rallied %@ic from the inside figures reached At the improvement there was considerable pressure to sell temporarily and prices gradually settled back 1/6%c, due chiefly to the quite liberal supply estimated for to-morrow. At the reduction there was a fair inquiry, and prices rallied \%@\4c, and the market ruled rather steady at the close. In oats the feature was the covering by shorts. The market opened easier and gradually became firmer, prices advancing %@1/2c, but reacted 4/c and closed steady. Hogs were fewer than Saturday's esti-mates, and packers were bidding for Oc-tober delivery, with no one willing to seil, which made the marking up of the prices easy. The close was at the top figures of the day. January pork is \$5c up; October lard, .624c, and October ribs, .49c. Rates to Buffalo were steady at 24c for wheat and 2c for corn to Buffalo. The estimated receipts for to-morrow are: Wheat, 315 cars; corn, 790 cars; oats, 350 cars; hogs, 16,000 head. The leading futures ranged as

Roots in Tile Drains. Country Gentleman.

Some striking instances are given in the New England Farmer of the choking of water courses and tile drains by the roots of trees. In these cases the roots entered at the joints between the pieces of tile. To prevent this clogging it is regarded as important to make the ditches straight, so that the tiles will come in close contact at the ends. There is no doubt that it may be well to lay the joints in lime cement for some time before the ditch is filled when trouble is expected. The importance of packing the earth well around the tile to prevent it from becoming displaced in filling should be well understood. The roots of willows are found to be specially trouble-some, and have spoiled the value of wells in this way with a mass of roots that seriously obstructed the flow of water. Most of the tile that is manufactured is sufficiently porous to admit the entrance of water through the sides when the joints the ground prevents making the drains perfectly straight, very long curves should be resorted to, which will allow the ends of the tile to be brought into close contact. The writer of the article which we have referred to, who appears to have examined many cases, says that however formidable the roots of willows have proved, he has known of no instances where roots from fruit trees have proved seriously troublesome; and he urges a special reason why drains should be straight beside that given in that a crooked tile drain is sure to cause sediment to settle at the crooks and eventually to choke the drain entirely.

THE

# INDIANAPOLIS JOURNAL

DAILY.

SUNDAY

WEEKLY

The Journal's price for daily is only 15 cents a week, and it has a very wide circulation, reaching a large number of people hitherto unable to afford the luxury of a first-class daily paper. Reports from agents and subscribers indicate a continued increase, and that what used to be regarded as a luxury has become a necessity. The new readers not only remain, but they are constantly increasing.

It is the purpose of the Journal to make itself even more indispensable to its patrons, new and old, and to still further widen its field. To this endit will not only endeavor to maintain the characteristics which have established its reputation as by far the best newspaper in Indiana, but will add such new features and improvements from time to time as are in accord with journalistic progress and that may tend to the advantage of its readers. It will, for example, give increased attention to State and local interests. What Indianians want is a paper in which Indiana affairs given are especial prominence and importance. This want the Journal has always supplied as no other paper published outside or inside the State is able to do; but the rapidly developing industries and business and social enterprises of the community call for additional consideration and space, With this in view its corps of correspondents has been increased until ithas a representative in nearly every town in the State Special traveling correspondents will visit the news centers of the State at frequent intervals, thus insuring the "write up" of every important event or matter of general interest.

Being published in the geographical center of Indiana the Journal is afforded unusual facilities for securing news promptly, and, what is of greater consequence, is able to reach its subscribers without delay. The running of morning trains from Indianapolis is very favorable to the early distribution of papers sent by mail or express, and in most towns within a radius of a hundred miles Journals are delivered as early as in the city where they are printed. In the more remote counties there is but little loss of time in trans-

portation. The Journal is the paper for Indianians and particularly for Indiane Republicans. The change of administration involves the settlement of political problems likely to be of the most direct personal concern to every farmer and business man in the State. All such matters will be set forth in detail, the Journal's Washington correspondent being instructed to give especial attention to every hing having a possible bearing on Indiana interests.

But though the Journal is Republican in politics it is non-partisan in the publication of news. Its constantendeavor is to secure facts unbiased by prejudice and to make its columns trustworthy records of each day's happenings. A large editorial force supplements the work of the press associations and the correspondents, and furnishes careful supervision for each department.

The Sunday Journal has a well-established literary character, superior to that of any Western paper. It is not defaced by "plate matter" nor filled with a heterogeneous mass of syndicate literature, but its contributions and miscellany are chosen with a view to their special fitness and adaptability to the tastes of the readers. The reading matter in any given number of the Sunday Journal is equal in quantity and is not inferior in quality to that found in the leading magazines. As an educational adjunct and a source of entertainment the Sunday Journal is indispensable in every well-regulated family.

The Weekly Journal, at \$1 per year, contains more reading matter than can be obtained for the money in any other shape. It is carefully edited and offer the news of the week in condensed shape and a variety of miscellany, agricultural and household literature that render it one of the best investments that any family can make. Try it and see. It has a large circulation in this and other States and agents find it an easy matter to secure large lists of subscribers. Special inducements offered to agents.
